

NDLI Awareness Program: NDLI Chapter Activity on 1st September 2026

On 1st September 2026, An NDLI Awareness Programme was organized for the first-year undergraduate engineering students to familiarize them with the resources and academic facilities available through the National Digital Library of India (NDLI). The session was conducted by the Ms.

Deblina Mukherjee, Librarian of RCCIIT. who provided an overview of the NDLI platform, its purpose, major features, and the wide range of digital

learning resources accessible to students. The students were guided on how to search, access, and utilize e-books, journals, research papers, lecture materials, theses, question papers, and other academic resources available through the platform. The session also highlighted the importance of developing effective digital information-searching habits and utilizing authentic academic resources for

coursework, assignments, projects, and self-directed learning. A practical demonstration of the platform was included to help students understand the process of registration, resource discovery, and navigation. The programme successfully created

awareness among the first-year students about NDLI as a valuable supplementary academic resource and encouraged them to make regular use of digital library facilities for their academic and professional development.
