

Seminar on 'Introducing NDLI' in the Orientation Session on 24th September 2025

On 24th September 2025, a seminar is arranged in the Orientation session of the first-year students 'Introducing NDLI' by Ms. Debalina Mukherjee, Librarian of RCCIIT. She explained in details the significance of NDLI Local Club at the Institute, which offers a single, open-access digital platform with millions of excellent learning resources across many engineering disciplines. NDLI significantly contributes to the academic and professional growth of engineering students. Students can access textbooks, reference books, research papers, lecture notes, simulations, theses, patents, and multimedia learning materials from a single interface thanks to NDLI, which was created under the Ministry of Education, Government of India, and compiles content from prestigious institutions like IITs, IISc, NPTEL, and other national and international repositories. She also explained that by providing resources that are in line with undergraduate, graduate, and doctoral curricula as well as competitive exams like GATE, ESE, and various technical certification programs, NDLI greatly supports conceptual clarity, interdisciplinary learning, and research-oriented education for engineering students. A few glimpses of the event is given below:
